

General Project Description:

RE&LS is responsible for the structural design of the additions and alterations to Letchworth Dining Hall on the campus of SUNY Geneseo, NY. The project consisted of total renovation of approximately 31,000 SF of space at two levels of the existing building. The scope of work also included replacement of the existing façade, removal of columns to open up the space for better layout of dining area, additions at several locations and renovation of base mechanical system. The goal of the project was to provide food service with improved efficiency and ambiance. This \$13 million project also included upgrade of the lateral load resisting system of the building.
