

General Project Description:

RE&LS was responsible for the structural design of this new 2-story facility designed in steel. The project consists of a new 22,000 SF facility dedicated to providing a combination of pediatric health services, healthcare coordination, and mental health services. This \$8.6 million dollar facility is the first of its kind nationwide and will co-locate the County's medical services for foster children with a supervised visitation center.

The project has achieved LEED Gold status and was the recipient of the 2010 American Public Works Association Project of the Year award.
