SURVEY DEPARTMENT PROMOTES HOLMQUIST TO PROJECT MANAGER

Rochester, NY- Ravi Engineering & Land Surveying (RE&LS) is proud to announce this promotion as the firm celebrates 25 years of incorporation serving the greater Rochester region and beyond as professional and consulting engineers.

Scott Holmquist is promoted to Subsurface Utility Engineering (SUE) Project Manager, effective immediately.

In his new position of SUE Project Manager, Mr. Holmquist puts his results-driven attention to SUE Survey projects: improving practice and procedures, maximizing efficiencies in scheduling and at job-sites, managing the permit processes through municipalities and state agencies, and delivering ever better communication and results to clients.

“Subsurface utility engineering is an area of growth for RE&LS and one our team is fully equipped to deliver,” says Holmquist. “I have enjoyed being a part of this group and streamlining our internal procedures- we deliver more accurate data, quicker response times and greater flexibility than we ever have before. Using these principles to improve SUE projects will build value-added service across the board.”

Mr. Holmquist has been an important part of the RE&LS Survey team, acting as Projects & Operations Administrator since 2014. In this role, he has facilitated day-to-day needs of the construction and SUE divisions of the Survey Department, streamlined internal process and response protocol for increased productivity, provided QA/QC review, and maintained relationships with clients and subcontractors.

Survey Department Manager Mike Bogardus credits Mr. Holmquist’s efforts in recent years for contributing to the success RE&LS has delivered with subsurface utility designation services. “The firm launched SUE services in 2016, and Scott’s focus on supporting our crews and our proposals gave us a solid start,” says Bogardus. “Since then, the team has seen workload increase as much as 400% from that first year and that’s certainly a credit to Scott. Having his experience and dedication as a project manager in this area will be a major asset not only to our crews, but to our clients who will benefit from more accurate, more efficient, and even more cost effective services from RE&LS.”

ABOUT THE FIRM:

RE&LS, established in 1995, is a full-service consulting engineering firm specializing in state-of-the-art structural, environmental and geotechnical engineering, as well as construction inspection and design and construction surveying services. A professional and technical staff of 118 work across New York State where offices are located in Rochester, Binghamton, Albany and Buffalo. The firm is certified with NYS as WMBE and is committed to providing technically sound solutions for clients that include state, municipal and private organizations.
